

Figure S1

Evaluation graph of the models of Nbs1 (red line) and Xrs2 (green line) tandem BRCT with respect to their sequence obtained using Verify3D. The red and black dashed line indicate the mean value for the Nbs1 and Xrs2 curve, respectively. The green dashed line mark the 0.1 threshold below which the probability of errors is significant. In Nbs1 and Xrs2 models, the lowest values are obtained in the linker between the two BRCT domains.
